What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over $404 million to more than 8,774 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Connecticut

Project Highlight: Assessment of a Composite Herbal Feed Additive on Reducing Haemonchus contortus in a Dual Purpose Sheep Operation

Dr. Erin Masurn, a veterinarian at Fork You Farms in Bantam, Connecticut, led a team of researchers to see if the herbal formula “Early Bird” could treat harmful parasites in sheep. Gastrointestinal nematodes are a type of parasite that can negatively impact the health and reproductive ability of sheep herds. “Early Bird” has shown to be successful at preventing gastrointestinal nematode propagation; however, researchers at Fork You Farms want to test the efficacy of “Early Bird” as a treatment method for sheep that have already been affected.

With the help of a Northeast SARE grant, Dr. Masurn ran an experiment to test how sheep infected with various parasites respond to the “Early Bird” treatment. According to researchers, “Early Bird” has the potential to increase the meat, fiber and dairy productivity of small ruminant and camelid operations by diminishing overall parasite burden. Using different species with varying parasite burdens gives producers the opportunity to gain a better understanding of the limits of herbal parasite control. This project will help veterinarians develop protocols for the usage of the product and help farmers determine its worth to their specific operations.

For more information on this project, see sare.org/projects and search for project number ONE21-399.

SARE in Connecticut

northeast.sare.org/state-profiles/connecticut/

$1,793,264 in total funding

26 grant project

(since 1988)

For a complete list of grant projects state by state, go to www.sare.org/state-summaries
SARE in Connecticut

Grants awarded
2019–2024

Total awards: **26 grants**
9 Farmer/Rancher
2 Research and Education
5 On Farm Research/Partnership
4 Graduate Student
6 Research Only

Total funding: **$1,793,264**
$159,410 Farmer/Rancher
$495,698 Research and Education
$117,787 On Farm Research/Partnership
$58,913 Graduate Student
$961,456 Research Only

Find a complete list of projects on page 3.

SARE grantees have reported the following impacts from their projects:

1,372 farmers participated in a SARE-funded project
494 farmers reported a change in knowledge, awareness, skills or attitude
12 farmers changed a practice

Learn about local impacts at:

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit northeast.sare.org/state-profiles/connecticut/ to learn more.

For detailed information on SARE projects, go to
www.SARE.org

SARE is funded by the USDA’s National Institute of Food and Agriculture (NIFA).

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.
Agriculture Projects Funded in Connecticut

By USDA's Sustainable Agriculture Research and Education (SARE) Program

Connecticut has been awarded $3,808,841 grants to support 92 projects, including but not limited to, 17 research and/or education projects, 3 professional development projects and 37 producer-led projects. Connecticut has also received additional SARE support through multi-state projects.
