

## What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$2.4 million to more than 32 initiatives [1].

### SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

### SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

### Project Highlight: Reduced-Tillage and Tarping for Small Scale Commercial Potato Growing in New York

Nook & Cranny Farm in Brooktondale, New York, participated in a research project to assess the effects of reduced tillage, tarping and mulching on potato production. To grow potatoes, most farmers depend heavily on tillage for soil preparation and weed management despite the potential negative impacts that deep tillage can have on soil health. Recently, a new method called tarping has gained a lot of attention from potato farmers due to its potential to improve soil health, reduce labor costs and increase productivity. Since tarping is a relatively new method, many farmers do not know how to successfully integrate it into their crop rotation. This inspired Dr. Tuori, the head of Nook & Cranny Farm, to conduct a series of experiments that explore the short- and long-term benefits of tarping on small-scale commercial farms.

Dr. Tuori and his team planted potatoes in a reduced-tillage strip and compared three experimental growing methods: tarping with mulching, tarping without mulching and no tarping with mulching. The researchers analyzed the effects of the different growing methods by measuring biological indicators of the soil. Ultimately, the experiments indicated that the tarping method offers a more environmentally sustainable approach to small-scale potato production than conventional tillage and hillling methods. This research shows that when done correctly, tarping is an accessible and versatile tool that small-scale farmers can use to produce a marketable potato yield while also fostering healthy soils.

For more information on this project, see [sare.org/projects](http://sare.org/projects) and search for project number FNE21-995.

## SARE in New Jersey

[northeast.sare.org/state-profiles/new-jersey/](http://northeast.sare.org/state-profiles/new-jersey/)

**\$2,363,456  
in total funding**

**32 grant projects**

(since 1988 [1])

For a complete list of New Jersey grant projects, go to  
[projects.sare.org/state-fact-sheets/](http://projects.sare.org/state-fact-sheets/)

[1] These totals reflect available data; complete information may not be available for all grant programs prior to 2016.

# SARE in New Jersey, 2021-2026

This is a summary of recent SARE-funded activities and impacts in the state. To search all SARE projects visit [projects.sare.org](https://projects.sare.org). For a list of all projects in New Jersey visit [projects.sare.org/state-fact-sheets/](https://projects.sare.org/state-fact-sheets/).

## Grants awarded

### Total awards: **32 grants**

- 15 Farmer/Rancher
- 2 Research and Education
- 1 Professional Development Program
- 7 Graduate Student
- 2 PDP State Program [2]
- 3 Research Only
- 2 Farming Community

### Total funding: **\$2,363,456**

- \$326,022 Farmer/Rancher
- \$498,422 Research and Education
- \$135,459 Professional Development Program
- \$104,492 Graduate Student
- \$258,074 PDP State Program [2]
- \$541,858 Research Only
- \$499,129 Farming Community

[2] The Professional Development Program (PDP) State Program is a non-competitive award that funds the activities of the state coordinator(s). See more below.

## Farmer and rancher impacts

SARE grantees have reported the following impacts from their projects:

**4,266 farmers participated in a SARE-funded project**

**61 farmers changed a practice**

Learn about local impacts at:  
[northeast.sare.org/sare-in-your-state/new-jersey/](https://northeast.sare.org/sare-in-your-state/new-jersey/)

## Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit [northeast.sare.org/state-profiles/new-jersey/](https://northeast.sare.org/state-profiles/new-jersey/) to learn more.
