What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over $404 million to more than 8,776 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Washington, D.C.

Project Highlight: Women for the Land: New Voices for Conservation and Water Quality in Virginia

The American Farmland Trust (AFT) is enacting a new program that is designed to provide women in agriculture with the resources they need to be successful. Over the years, the population of female farmers has significantly increased, with about one third of the nation’s farmland currently managed by women. Research suggests that this number is only going to increase, with an estimated seventy percent of the nation’s farmland to be operated by women in the next twenty years. Despite their growing numbers, women are underrecognized for their tremendous contribution to farming and are fundamentally underserved by the programs that provide farmers with advice, funds and resources. To address this, the American Farmland Trust obtained a SARE grant to fund an educational program designed specifically for women to learn how to incorporate sustainable agriculture practices on their farms.

The AFT invited women agricultural landowners to engage in a three-part learning program about local conservation agencies and how to integrate sustainable farm practices on their land. The program used participatory, women-only Learning Circles designed to build confidence and to empower women to take conservation action. The participants were also provided with an abundance of resources on how to maintain a sustainable yet profitable production strategy. Over the course of this project, fifty six women successfully completed the program, with several of them going on to successfully implement the strategies and practices they learned. This project provides a model for how other organizations can actively include women in the agricultural field while increasing conservation efforts.

For more information on this project, see sare.org/projects and search for project number EDS19-304.

SARE in Washington, D.C.

northeast.sare.org/state-profiles/washington-d-c/

$154,914 in total funding

3 grant project

(since 1988)

For a complete list of grant projects state by state, go to www.sare.org/state-summaries
SARE in Washington, D.C.

Grants awarded
2019–2024

Total awards: 3 grants
1 Professional Development Program
1 Graduate Student
1 Education Only

Total funding: $154,914
$89,914 Professional Development Program
$15,000 Graduate Student
$50,000 Education Only

Farmer and rancher impacts
2019–2024

SARE grantees have reported the following impacts from their projects:

161 farmers participated in a SARE-funded project
51 farmers reported a change in knowledge, awareness, skills or attitude
15 farmers changed a practice

Learn about local impacts at:
northeast.sare.org/sare-in-your-state/washington-d-c/

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit northeast.sare.org/state-profiles/washington-d-c/ to learn more.
