What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over $359 million to more than 8,107 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, granteeproduced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Washington, D.C.

Project Highlight: Bringing Fresh Foods to Low-Income Areas

A city food bank used SARE funding to boost activity at its farmers’ market—and the community’s access to fresh, healthy foods—in a low-income neighborhood where one supermarket chain store serves about 200,000 people.

Capital Area Food Bank leaders attracted about 1,800 customers to their Anacostia Farmers Market in the 2004 season, a record number for the market, by creating incentives for farmers and consumers to participate.

To help ensure regular farmer involvement, organizers offered them from $300 to $750 per week, depending on the availability of funds.

To attract consumers, organizers advertised and held special events connected with the market, including summer celebrations, a chili cook-off, family days, cooking demonstrations and youth learning experiences. One activity involved taking urban youth on a field trip to an organic farm about 10 miles away in Maryland.

Project leaders expanded the market’s offerings to include specialty items such as Amish cheeses, culinary herbs, homemade jams and mustards, mint tea, honey, pasta sauce and tomato soup.

Organizers also acquired a food stamp/Electronic Benefits Transfer (EBT) sales tool for the market, which was intended to allow them to serve the neighborhood’s poorest residents.

For more information on this project, see sare.org/projects, and search for project number LNE01-149.

SARE in Washington, D.C.

capitalareafoodbank.sare.org/sare-in-your-state/washington-d-c

$234,491 in total funding

4 grant projects

(since 1988)

**Contact Your SARE State Coordinator**

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit [northeast.sare.org/state-pages/washington, d.c.](http://northeast.sare.org/state-pages/washington, d.c.) to learn more.

State coordinator positions are temporarily vacant for Washington, D.C..
Contact your SARE region for additional information.

---

SARE is funded by the USDA’s National Institute of Food and Agriculture (NIFA).

For detailed information on SARE projects, go to [www.SARE.org](http://www.SARE.org)

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.
WASHINGTON, D.C.

by USDA's
Sustainable Agriculture Research and Education (SARE) Program

Washington, D.C. has been awarded $234,491 grants to support 4 projects, including but not limited to, 2 research and/or education projects and 1 professional development project and . Washington, D.C. has also received additional SARE support through multi-state projects.
